NIGHT RATING

EASA PROGRAM

WE BUILD

EXPERIENCES

Flying Academy's mission is to make YOU the most professional, skilled and dedicated pilot. We are completely equipped for the challenges of employment opportunities of airlines all over the world.

Our mission is a commitment to our students based on personal approach and care, guide them step by step, close monitoring, and adapting the training.

This is our promise!

OUR STORY

... SO FAR

Perfect safety record,
unprecedented student support,
and best in class training environment is our promise.

International TRAINING

We are Flying Academy - International Flight Training center with more than three decades of experience, founded by airline pilots for future airline pilots.

Perfect SAFETY

The regulation in the European Union is very strict about aviation safety. Our fleet is maintained at the highest levels of safety. Flying Academy prioritizes and promotes safety culture in all aspects of its operations.

Our FLEET

Flying Academy, one of the leading global flight schools, is proud to present our fleet. It consists of single and multi-engine aircraft. The whole fleet, at both continents where we operate, consists of over 42 aircraft.

Online TRAINING

With Flying Academy's brand new online classrooms, you can start your theoretical training without leaving the comfort of your home, in a decent amount of time!

EASA NR (A)

WHAT IS EASA NR (A)?

Night Rating qualification allows you to fly during night time. NR(A) is a natural step after completing your PPL(A) to make your Time Building more enjoyable and it is also a requirement for IR(A) and CPL(A). In order to be able to safely operate an aircraft during the night and enjoy a stable atmosphere, smooth air, and unforgettable views of city lights, pilots are required to complete night ground and flight training.

Aside from the fact that the Night rating is required for your professional pilot license, every pilot wants to fly without being limited to daytime flying only.

COURSE BENEFITS

SAVE YOUR TIME WITH ONLINE CLASSES

You will begin all of your theoretical training from the comfort of your home. Afterwards, you shall come to the school to carry out the flight training portion of your course.

WHY GET THIS RATING?

Adding the Night Rating to your Pilot License is an essential part of successfully becoming a professional pilot. Continue your journey to the sky by gaining all required ratings to join commercial airlines!

SAVE YOUR VALUABLE FUNDS

This organisation of training will decrease the costs of the training, providing you with high-quality theoretical training following the current trends, while allowing you to save on the living costs.

17 YEARS OLD**

**TO BE AT LEAST CLASS
2 MEDICAL HOLDER**

BE A PPL(A) HOLDER

**TO HAVE SUFFICIENT
KNOWLEDGE OF
MATHEMATICS & PHYSICS**

**PROFICIENCY IN THE
ENGLISH LANGUAGE**

THEORETICAL TRAINING

The ground training consists of theoretical preparation for flight training and lays the foundation for your flight training. According to the EASA syllabus, the theoretical preparation consists of 5 hours with an instructor.

The course consists:

- Interactive lessons with maximum usage of modern study materials and equipment.
- You can use our Learning Management System (LMS) to prepare for lessons on self-study basis and then you will attend 5 hours of ground training with experienced instructors.

PRACTICAL TRAINING

The flight training is performed on a single engine piston (SEP) aircraft according to visual flight rules (VFR) at night.

The training consists of at least 5 hours, out of which:

2 hours:

- Local night flights reviewing basic manoeuvres, take-off and landing procedures.
- You will review all the basic maneuvers at night, such as steep turns, stalls, upset recovery
- Learn how to recover from any situation with partially reduced visual reference.
- Review every emergency situation at night and learn how to handle it.

2 hours:

- Navigation cross-country night flight
- Learn how to navigate at night with visual reference, radionavigation equipment and GPS.

1 hour:

- Local solo night flight under supervision of the flight instructor on the ground including 5 take-offs and 5 landings.

There is no examination conducted for Night Rating.

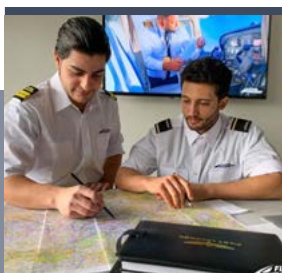

The validity of the rating is unlimited.

TRAINING LOCATIONS

OUR LOCATIONS

With our international community, we also have our training locations spread across the globe. We have four bases in the heart of Europe. For this course you can join us in following bases.

PRAGUE CZECH REPUBLIC

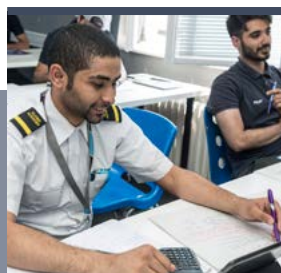

The Czech Republic is the perfect location for both practical and theoretical training. Flying Academy is the first choice of pilot training for future Professional or Private Pilots from all continents.

VIENNA - BAD VÖSLAU AUSTRIA

Vienna, Austria is the perfect location for your professional pilot training. With new modern equipment, exclusive studios and technology, combined with our highly trained and experienced instructors.

BRNO WEST FALCON FIELD CZECH REPUBLIC

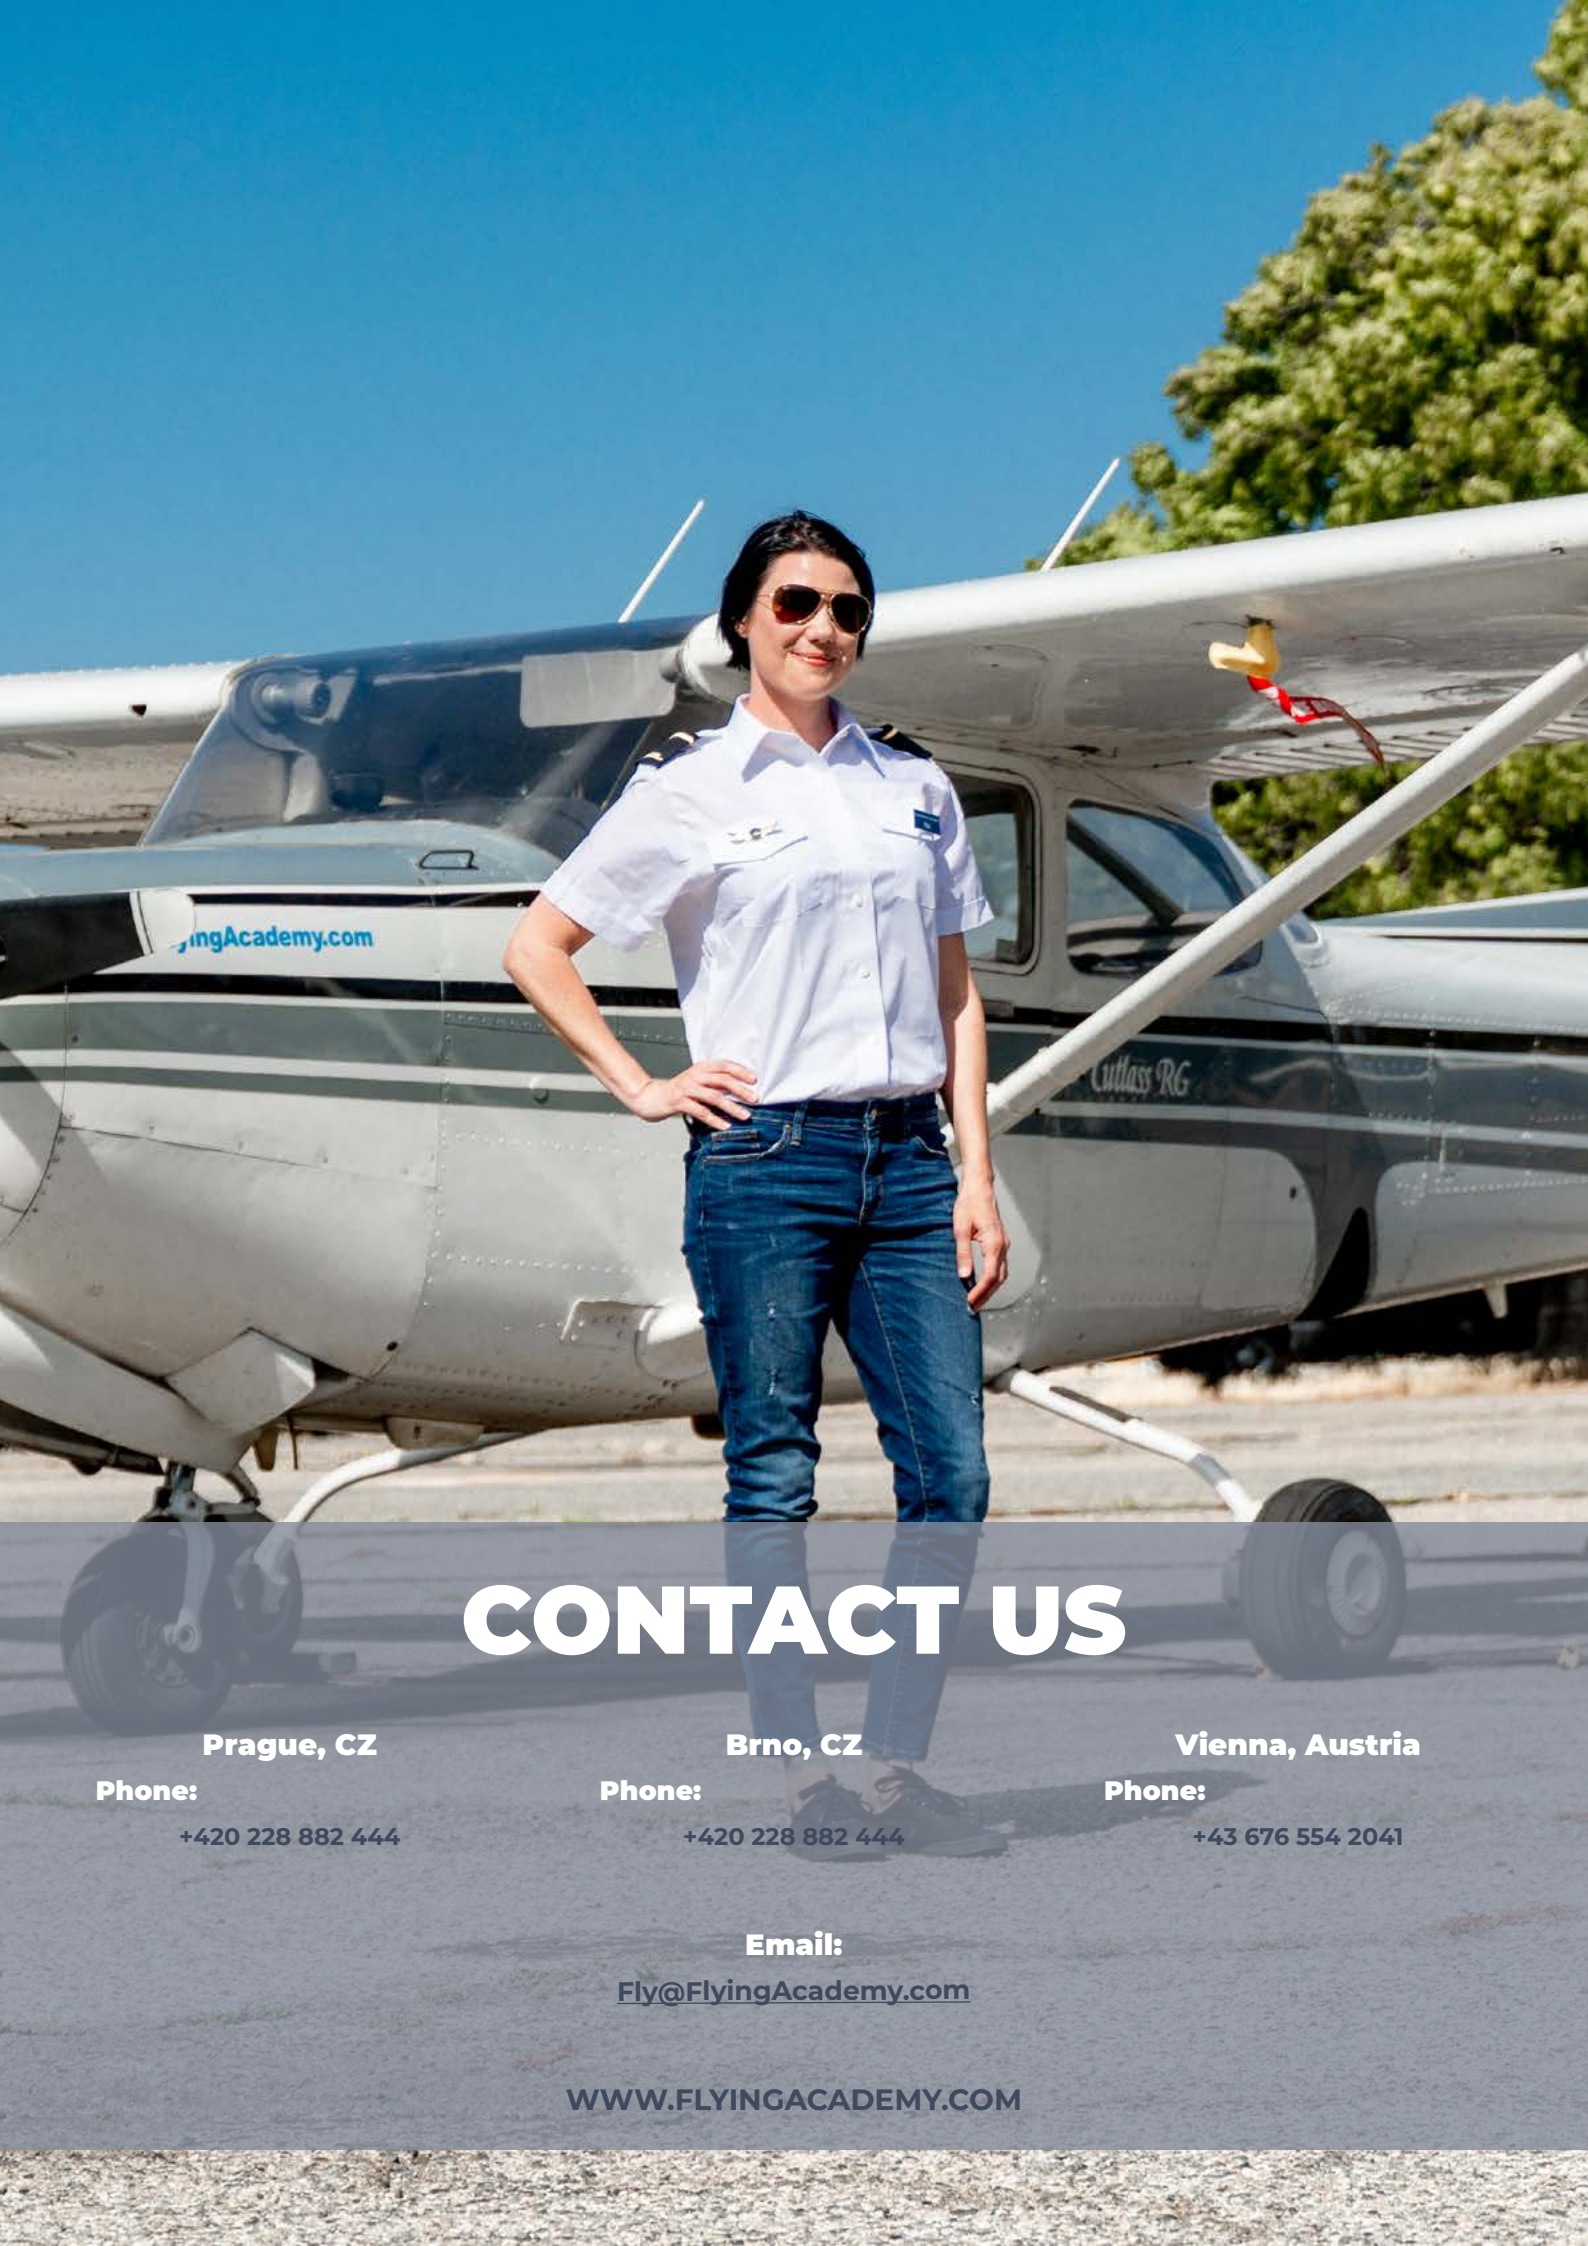

Located in the heart of Europe, the Brno Falcon Field allows students to explore all different regions of Europe from the cockpit by being in the middle ground between Eastern & Western Europe

BRNO TUŘANY CZECH REPUBLIC

Flying Academy is located at Brno Tuřany International Airport (LKTB). Use an opportunity to travel Europe as a part of your flight training, in a multinational airport.
