# FLIGHT INSTRUCTOR

EASA PROGRAM

**WE BUILD**

---

# EXPERIENCES

Flying Academy's mission is to make YOU the most professional, skilled and dedicated pilot. We are completely equipped for the challenges of employment opportunities of airlines all over the world.

Our mission is a commitment to our students based on personal approach and care, guide them step by step, close monitoring, and adapting the training.

This is our promise!

# OUR STORY

... SO FAR

Perfect safety record,  
unprecedented student support,  
and best in class training environment is our promise.

## International TRAINING

We are Flying Academy - International Flight Training center with more than three decades of experience, founded by airline pilots for future airline pilots.

## Perfect SAFETY

The regulation in the European Union is very strict about aviation safety. Our fleet is maintained at the highest levels of safety. Flying Academy prioritizes and promotes safety culture in all aspects of its operations.

## Our FLEET

Flying Academy, one of the leading global flight schools, is proud to present our fleet. It consists of single and multi-engine aircraft. The whole fleet, at both continents where we operate, consists of over 42 aircraft.

## Online TRAINING

With Flying Academy's brand new online classrooms, you can start your theoretical training without leaving the comfort of your home, in a decent amount of time!

# EASA FLIGHT INSTRUCTOR

## WHAT IS EASA FLIGHT INSTRUCTOR?

The EASA FI(A) rating allows you to conduct ground and flight instruction for the issue of EASA PPL(A) and class and type ratings for SEP airplanes.

Until you have completed at least 100 hours of flight instruction and, in addition, has supervised at least 25 student solo flights, the privileges of the rating are restricted.

The restrictions will be removed from the rating when the above requirements have been met and on the recommendation of the supervising EASA FI(A).

# COURSE BENEFITS

## SAVE YOUR TIME WITH ONLINE CLASSES

You will start with online FI Theory from the comfort of your home. Afterwards, you shall come to the school to carry out the flight training portion of your course.

## BUILD YOUR HOURS

Becoming a Flight Instructor gives you the opportunity to build your hours while you train and learn how to teach aspiring pilots. Airline piloting being a competitive field, this course gives you an added advantage when you apply for a job!

## SAVE YOUR VALUABLE FUNDS

This organisation of training will decrease the costs of the training, providing you with high-quality theoretical training following the current trends, while allowing you to save on the living costs.

## EASA FLIGHT INSTRUCTOR IN NUMBERS

**30 h**

**FLIGHT TIME**

**FLIGHT  
INSTRUCTOR**

COURSE ENTRY

# REQUIREMENTS

**TO BE AT LEAST  
18 YEARS OLD**

---

**TO BE AT LEAST CLASS  
1 MEDICAL HOLDER**

---

**TO BE PROFICIENT IN  
THE ENGLISH LANGUAGE**

---

**TO HAVE SUFFICIENT  
KNOWLEDGE OF  
MATHEMATICS & PHYSICS**

---

**TO PASS OUR INITIAL  
ASSESSMENT**

---

**TO BE A CPL(A) HOLDER**

---

---

# THEORETICAL TRAINING

The theoretical training is an integral part of the FI(A) rating course. It can be done concurrently with the flight training or used as a separate ground training course. The theoretical training is divided into 3 stages and includes 125 hours.

- **Stage I:** You will be made familiar with the new privileges and responsibilities of a flight instructor. In stage 1 of the ground training, you will learn teaching and evaluation methods, lesson planning options and refresh your knowledge of risk management, human performance, and limitations.
- **Stage II:** You will become familiar with the instruction of a student up to the first solo flight. Furthermore, you will review preflight and postflight actions, traffic pattern flying, and basic maneuvers.
- **Stage III:** During this stage, you will learn how to introduce your future students to thorough cross-country flight planning and the different methods of navigation. You will obtain a deeper understanding of the physiological factors that can affect the pilot and passengers. Upon completion of this stage, you will be able to make a sound decision on sending future students on solo cross-country flights.

# PRACTICAL TRAINING

The practical training consists of at least 30 hours of flight instruction and is divided into 2 stages.

- **Stage I:** During this stage, you will obtain the foundation for all future instructor training. You will become familiar with the training airplane and learn how the airplane controls are used to establish and maintain specific flight attitudes and ground tracks from the instructor's side of the airplane. You will also gain the proficiency to train a student to fly solo in the training airplane in the traffic pattern.
- **Stage II:** During this stage, you will obtain the foundation for all future instructor training related to advanced training with the main focus on cross-country operations. You will gain the proficiency to train a student to fly solo in the training airplane on cross country flights. Furthermore, the student will do some flight training at night time to review night flying procedures.

---

# EXAMINATIONS

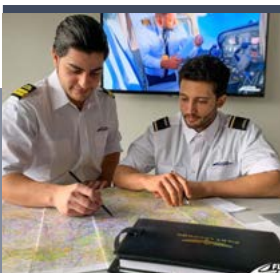

During your practical skill test, you will be assessed on your ability to operate the aircraft from the right-hand seat and demonstrate your ability to conduct all maneuvers accurately and within limits and respect all regulations and limitations specific to IFR flights.

# TRAINING LOCATIONS

## OUR LOCATIONS

With our international community, we also have our training locations spread across the globe. We have four bases in the heart of Europe. For this course you can join us in following bases.

### PRAGUE CZECH REPUBLIC

The Czech Republic is the perfect location for both practical and theoretical training. Flying Academy is the first choice of pilot training for future Professional or Private Pilots from all continents.

### VIENNA - BAD VÖSLAU AUSTRIA

Vienna, Austria is the perfect location for your professional pilot training. With new modern equipment, exclusive studios and technology, combined with our highly trained and experienced instructors.

### BRNO WEST FALCON FIELD CZECH REPUBLIC

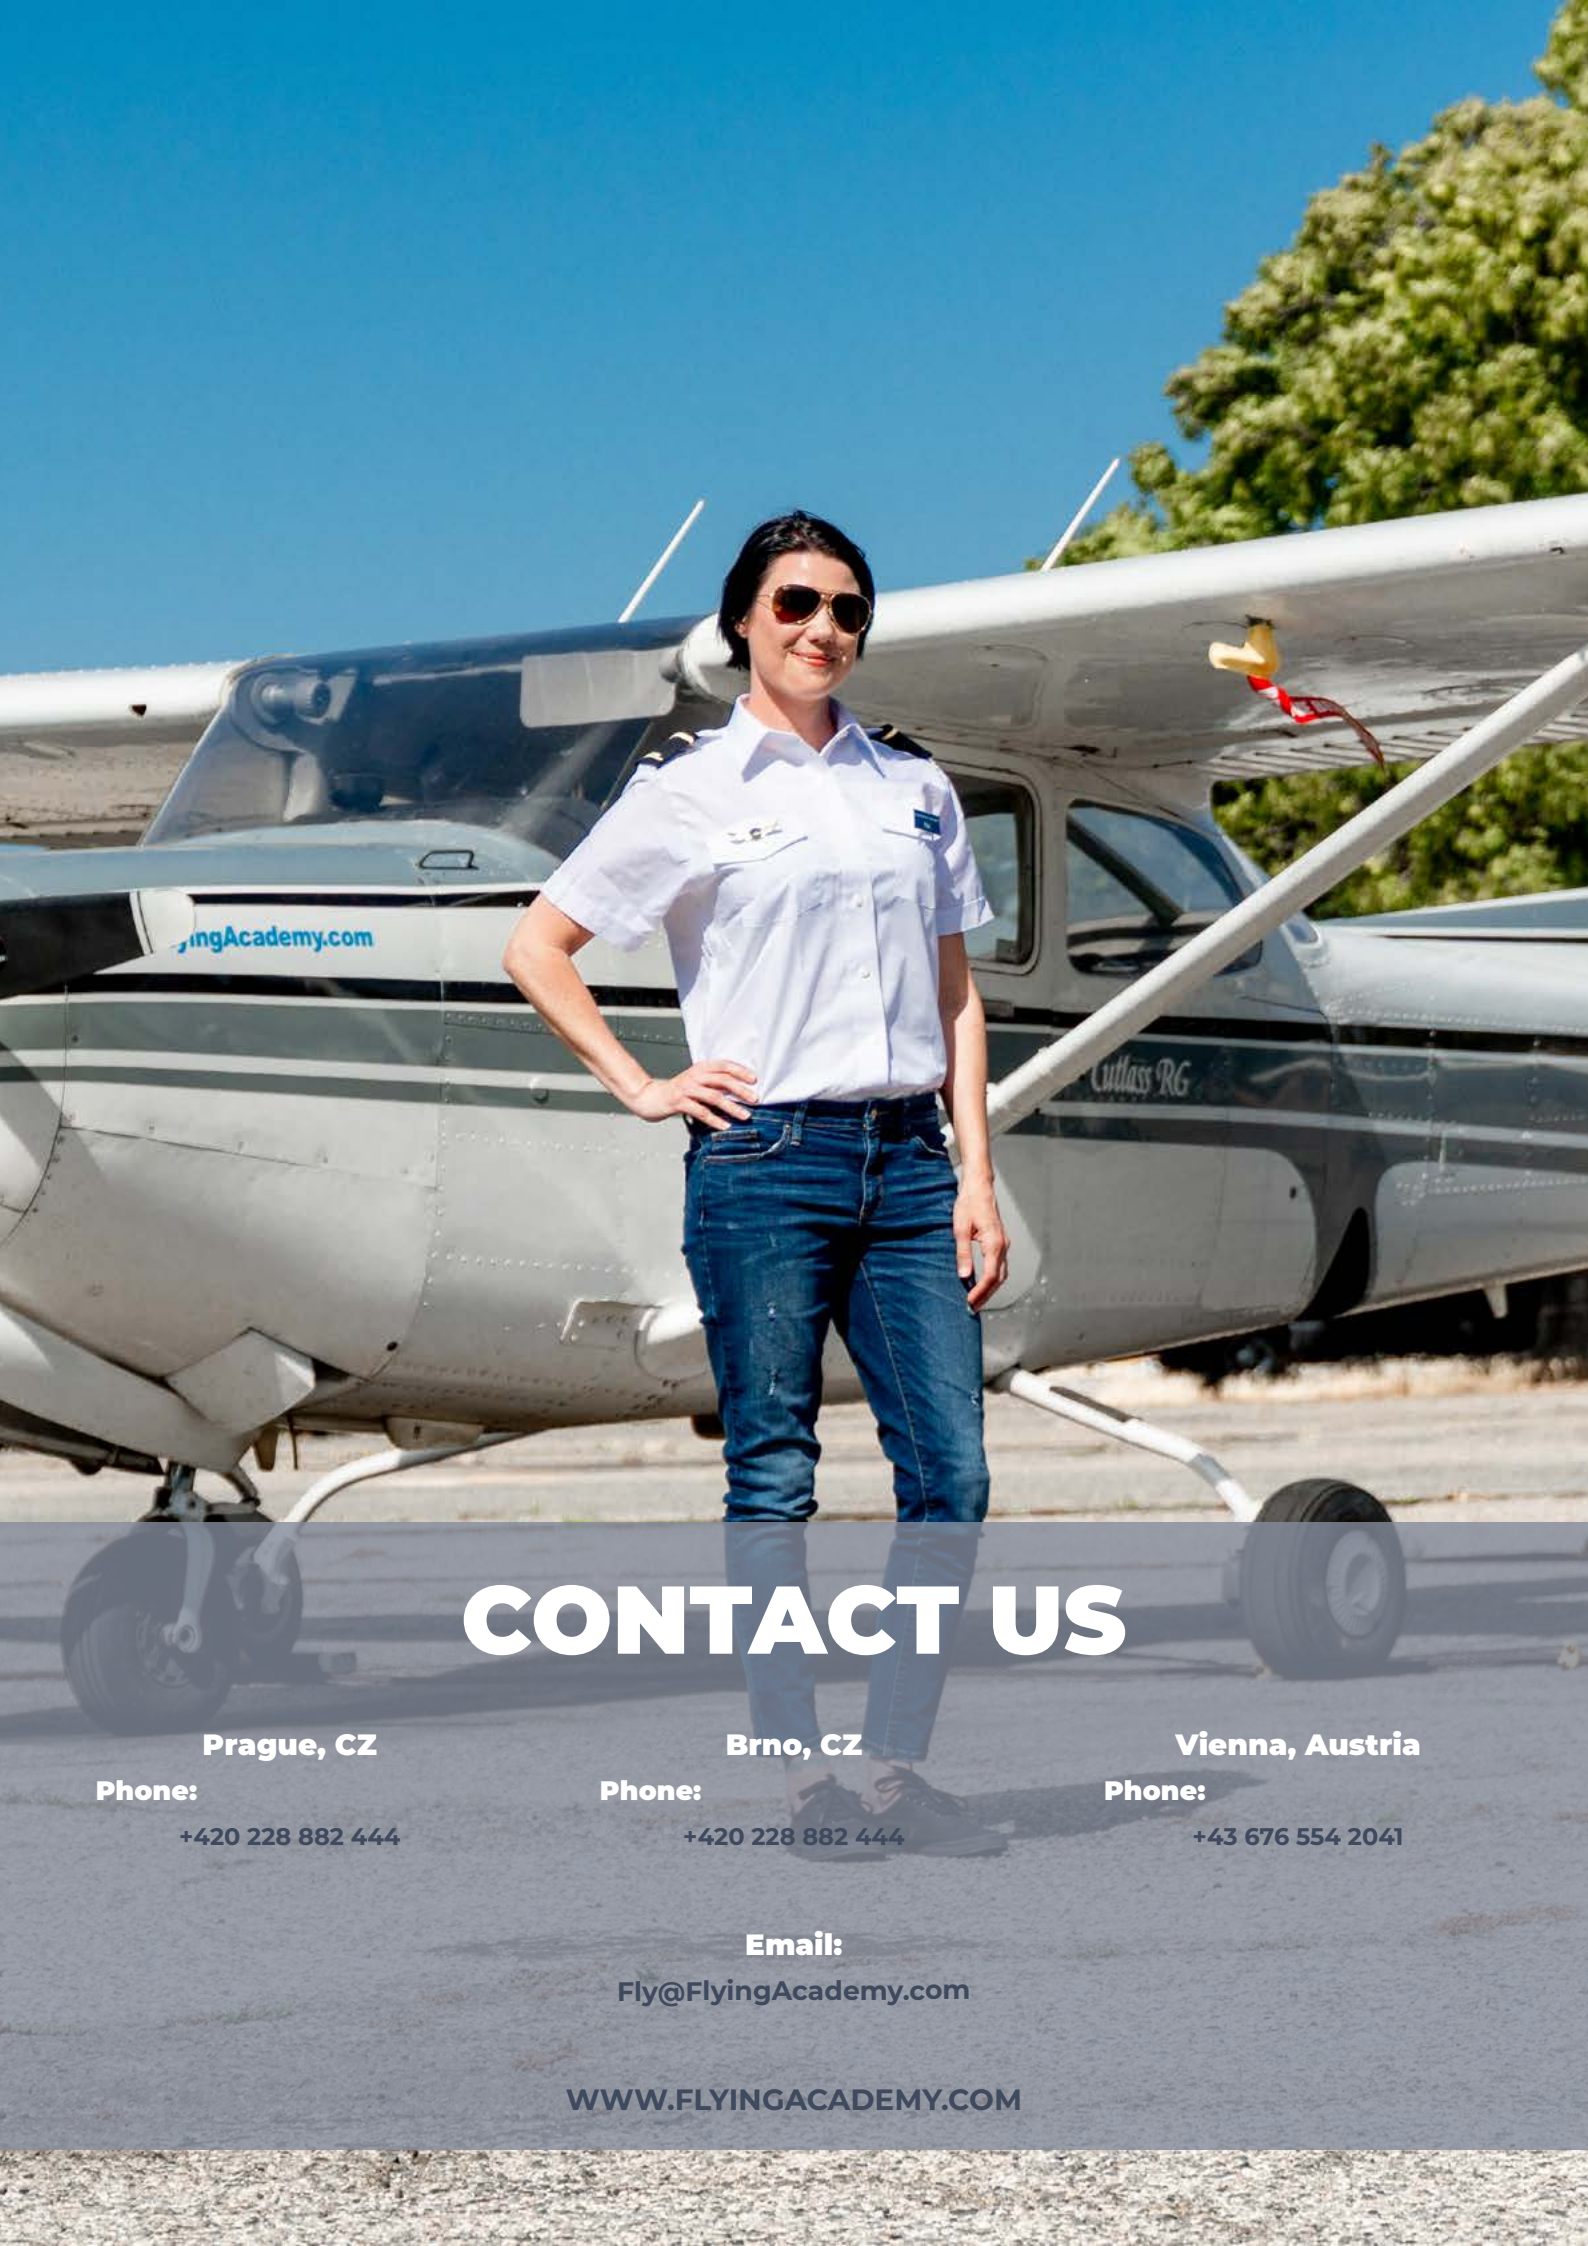

Located in the heart of Europe, the Brno Falcon Field allows students to explore all different regions of Europe from the cockpit by being in the middle ground between Eastern & Western Europe

### BRNO TUŘANY CZECH REPUBLIC

Flying Academy is located at Brno Tuřany International Airport (LKTB). Use an opportunity to travel Europe as a part of your flight training, in a multinational airport.
